

I am writing because I am concerned about LPFM possibly replacing the nationally/regionally broadcast K-LOVE radio program. I live in a small town, and not having access to this national/regional broadcast would have a big impact on me and my family. We listen to K-LOVE everyday. Whenever we have the radio on, it's turned to K-LOVE (104.3 Texarkana-Hope). It means so much to us to have nationally broadcast Christian radio. It is family friendly and supports what we value as a family. If we lost access to this broadcast, there would be a big hole for our family as well as our community. Many people listen to K-LOVE because of its positive and encouraging message and music. It is a wonderful, uplifting part of so many people's lives. Keeping K-LOVE available on FM stations is valuable to the public interest--it is a positive source of entertainment and music for everyone at any age. It is uplifting and parents don't have to worry about unwanted influences. Isn't there enough music and tv for us to worry about--why take away something that doesn't require censorship, seven second delay or any other rules in order for it to be presentable for public listening? This broadcast is rare and taking it away because national/regional broadcasts are not valued would certainly have a negative impact on communities and families. Please consider my request to not allow LPFM to bump this broadcast off the air.
